## Module 12 Challenge Submission File

### Web Development

Make a copy of this document to work in, and then respond to each question below the prompt. Save and submit this completed file as your Challenge deliverable.

#### HTTP Requests and Responses

1. What type of architecture does the HTTP request and response process occur in?

client/server based

2. What are the parts of an HTTP request?

request line, headers and message body.

3. Which part of an HTTP request is optional?

message body

4. What are the three parts of an HTTP response?

A message body, status line, series of HTTP/fields headers.

5. Which number class of status codes represents errors?

fourth class

6. What are the two most common request methods a security professional encounters?

GET and POST are the 2 most common

7. Which type of HTTP request method is used to send data?

The POST

8. Which part of an HTTP request contains the data being sent to the server?

The body request

9. In which part of an HTTP response does the browser receive the web code to generate and style a webpage?

response body

## Using curl

10. What are the advantages of using `curl` over the browser?

Curl is able to request and send data to a URL. It is also flexible and the URLs can be operated through the terminal.

11. Which `curl` option changes the request method?

-X

12. Which `curl` option sets request headers?

curl -v or -H

13. Which `curl` option is used to view the response header?

-I

14. Which request method might an attacker use to figure out what HTTP requests an HTTP server will accept?

option

## Sessions and Cookies

15. Which response header sends a cookie to the client?

```
HTTP/1.1 200 OK
```

```
Content-type: text/html
```

```
Set-Cookie: cart=Bob
```

```
Set-Cookies HTTP/1.1 200 OK Content-type: text/html Set-Cookie: cart=Bob
```

16. Which request header will continue the client's session?

```
GET /cart HTTP/1.1
```

```
Host: www.example.org
```

```
Cookie: cart=Bob
```

```
GET /cart HTTP/1.1
```

```
Host: www.example.org
```

```
Cookie: cart=Bob
```

```
'Connection: keep-alive'
```

## Example HTTP Requests and Responses

Use the following sample HTTP request and response to answer the questions in this section:

### HTTP Request

```
POST /login.php HTTP/1.1
```

```
Host: example.com
```

```
Accept-Encoding: gzip, deflate, br
```

```
Connection: keep-alive
```

```
Content-Type: application/x-www-form-urlencoded
```

Content-Length: 34  
Upgrade-Insecure-Requests: 1  
User-Agent: Mozilla/5.0 (Linux; Android 6.0; Nexus 5 Build/MRA58N)  
AppleWebKit/537.36 (KHTML, like Gecko) Chrome/80.0.3987.132 Mobile  
Safari/537.36

username=Barbara&password=password

17. What is the request method?

post

18. Which header expresses the client's preference for an encrypted response?

Upgrade-Insecure-Requests: 1

19. Does the request have a user session associated with it?

No the Session is not reestablished yet

20. What kind of data is being sent from this request body?

Login credentials

## HTTP Response

HTTP/1.1 200 OK

Date: Mon, 16 Mar 2020 17:05:43 GMT  
Last-Modified: Sat, 01 Feb 2020 00:00:00 GMT  
Content-Encoding: gzip  
Expires: Fri, 01 May 2020 00:00:00 GMT  
Server: Apache  
Set-Cookie: SessionID=5  
Content-Type: text/html; charset=UTF-8  
Strict-Transport-Security: max-age=31536000; includeSubDomains  
X-Content-Type: NoSniff  
X-Frame-Options: DENY  
X-XSS-Protection: 1; mode=block

[page content]

21. What is the response status code?

200 ok

22. What web server is handling this HTTP response?

Apache

23. Does this response have a user session associated with it?

Yes SessionID=5 SessionID=5 SessionID=5 SessionID=5

24. What kind of content is likely to be in the [page content] response body?

Detail of the page configuration

25. If your class covered security headers, what security request headers have been included?

Strict-Transport-Security: max-age=31536000; includeSubDomains

## Monoliths and Microservices

26. What are the individual components of microservices called?

services

27. What is a service that writes to a database and communicates to other services?

Apis attp protocol

28. What type of underlying technology allows for microservices to become scalable and have redundancy?

Load balancer

## Deploy and Test a Container Set

29. What tool can you use to deploy multiple containers at once?

Docker Compose

30. What kind of file format is required to deploy a container set?

Yaml format

## Databases

31. Which type of SQL query would you use to view all the information in a table called customers?

```
SELECT column_name customers;
```

32. Which type of SQL query would you use to enter new data into a table? (You don't need a full query, just the first part of the statement.)

```
INSERT INTO table_name (column_1,) VALUES (value_1) ;
```

33. Why would you never run `DELETE FROM <table-name>;` by itself?

It will delete the whole table

## Optional Additional Challenge Activity: The Cookie Jar

**Question 1:** Did you see any obvious confirmation of a login? (Y/N)

[Enter answer here]

**Question 2:** How many items exist in this file?

[Enter answer here]

**Question 3:** Is it obvious that you can access the dashboard? (Y/N)

[Enter answer here]

**Question 4:** Look through the output where Dashboard is highlighted. Does any of the wording on this page seem familiar? (Y/N) If so, you should be successfully logged in to your Editor's dashboard.

[Enter answer here]

**Question 5:** What happens this time?

[Enter answer here]
